### **SWEPKO 212 Moly-XP Multi-Grade Gear Lube SAE 75W140 with Syntheon™**

Is a multi-purpose gear lube with a wide operating temperature range.

#### ***Advantages:***

- Contains Moly-XP for additional friction reduction, smoother operation, and longer equipment life.
- Made with Syntheon™ base fluid blend to provide a wide operating temperature range, superior oxidation resistance, and longer fluid life.
- Recommended for use where an ISO 320 or ISO 460 gear oil is required.
- Can improve fuel economy in over the road vehicles.
- Will not channel or solidify in cold weather down to -40°F (-40°C).
- Extends oil life as much as two to three times or more.
- Controls varnish, sludge, corrosion, and rust.
- Contains a limited slip additive for differentials.
- Ideal for off-road, dirty, wet, conditions.

#### ***Cautions:***

SWEPKO 212 is a full SAE 140 viscosity at operating temperatures.

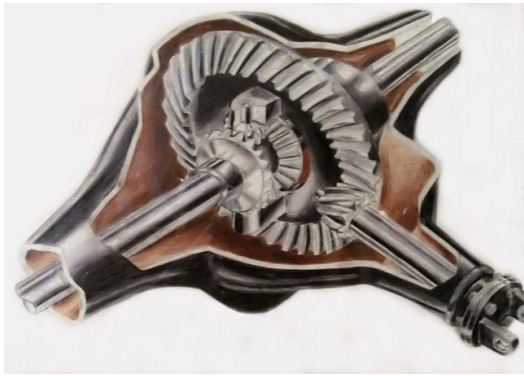

#### ***Recommended for use in:***

Manual Transmissions

Gear boxes

Differentials

***Demonstrations:***

Water separation: Remember to add the water first, then the SWEPCO 212, and then the paper clip. Explain how 212 makes it easy to remove water and condensation form the gear box.

John Barnes

Senior Scientist, SWEPCO
